MULTITASKING

The extent to which individuals prefer variety and handling multiple tasks, as opposed to predictability and focusing on one thing at a time.

Tips

Leveraging Your Multitasking Style

Leverage this strength by multitasking smartly. Group together tasks that require a similar skill, mindset, or level of concentration. By streamlining your process, you can complete tasks with greater efficiency and ease.

To maximize your productivity, differentiate between those tasks that require focus and those you can multitask. There are some tasks that you can easily dip in and out of without sacrificing quality. However, other tasks require your undivided attention for a solid period of time.

Because you are comfortable multitasking, you can use down time wisely by saving small, easy tasks for those brief windows of extra time you may find throughout the day.

SOCIABILITY

The extent to which individuals seek out and enjoy social interactions as opposed to a preference for being alone or one-on-one interactions.

Tips

Leveraging Your Sociability Style

Utilize your sociability style to build strong work relationships both within and outside of your organization. This will create a strong professional network which you can leverage throughout your career. Use social gatherings and online platforms to maintain your social networks.

Make the most out of your social interactions by refining your interpersonal communication. Ask for feedback from a trusted mentor or friend, and commit to leveraging feedback to improve.

Use social interactions to learn about the motivations and needs of others. Leverage this knowledge to better serve your customers and work with your colleagues.

Closing Gaps

ACCOMMODATION

The extent to which individuals place more emphasis on accommodating the needs of others as opposed to prioritizing their personal needs.

Tips

Adapting Your Accommodation Style

Find ways to arrive at common ground when working with others. Your tendency may be to protect your own interests (which is valid), but look for opportunities to compromise or find a middle ground option with which everyone can live.

When something frustrates you about another person, look for ways to help them rather than complain. Turn the problem into a solution by offering your assistance.

Try to include new people and make an effort to build relationships with them. Be welcoming and offer your assistance and guidance.

FRUSTRATION TOLERANCE

The extent to which individuals have a resilient and positive outlook under most work circumstances as opposed to being concerned about what could go wrong.

Tips

Adapting Your Frustration Tolerance Style

You may find yourself so preoccupied with what could go wrong, that you become discouraged and want to give up. Make an effort to turn negative thinking into constructive problem solving. Break down large obstacles into manageable steps, and focus on one step at a time. As challenges arise, take time to explore solutions.

Being overly negative can impact your relationships with your coworkers. If you are feeling worried or pessimistic, consider whether you need to express your opinion and how it might impact others. It might be better to find a more positive way to phrase your concern.

Sometimes stress and pressure can make you feel overwhelmed or defeated. Try to find ways to manage those feelings when you are facing challenges at work. Taking a step away from the problem, talking to a good friend, or finding even a few moments to relax can help you to recharge or see things from a different perspective.

PREFERENCE FOR STRUCTURE

The extent to which individuals prefer to be provided with direction and structure in their work environment as opposed to a more loosely defined work setting.

Tips

Adapting Your Preference for Structure Style

Although you may prefer flexible work environments, remember that some structure is necessary. When you are given direct and specific instructions, take a moment to understand why that process is in place. If you don't understand the purpose of the existing processes or structure, ask for clarification or provide a recommendation for improvement.

You may have more freedom in your job than you realize. Identify the areas within your role that might have more flexibility for you to make an impact. Go through the proper channels to pitch your idea and don't be discouraged if your idea is not accepted the first time. Focus on what you can influence and accept what you cannot.

Recognize that others may need more guidance or structure than you. When working with a team or leading others, provide clear directions so everyone works together cohesively and effectively. Check for understanding and be patient when others need more guidance.

PROCESS-FOCUSED

The extent to which individuals prefer to be organized and structured in the way they work, rather than taking a less methodical approach.

Tips

Adapting Your Process-Focused Style

Take ten minutes at the beginning of each workday to prioritize your tasks. Keep a short list of things that are necessary to accomplish and work through the list in order of priority. Check completed items off as you accomplish them.

Before you start a task, make sure you take the time to think through the important steps. Are there things you should do before you can proceed from one step to another? Are there tasks that can be worked on simultaneously? What

should be done during each step?

Leverage technology to keep your schedule and projects running smoothly. Features like color coding and audio alarms can help you ensure that you don't miss appointments or deadlines.

WORK INTENSITY

The extent to which individuals work hard to accomplish many things quickly as opposed to working methodically or at a less hurried pace.

Tips

Adapting Your Work Intensity Style

Set deadlines and stick to them. For longer term assignments, identify small, intermediary steps and assign a deadline to each one. Track your progress as you complete each step.

If you find yourself lacking energy during the day, try to take a few moments to take a step back from the task at hand and recharge.

Don't jump back and forth between tasks. It's easier to maintain your focus when it isn't divided. Finish the most important tasks first and then be purposeful in your intent to complete the rest.
