Introduction

Your success in any job depends on the value of your contribution to the organization. Managers, mentors and professional coaches can encourage, advise and guide you as you grow professionally. However, the ultimate responsibility for your career development is yours and yours alone.

This report is designed to assist you in managing and developing your career. For many jobs, personal skills are as important as technical skills in producing superior performance. Personal skills are often transferable to different jobs, whereas technical skills are usually more specific.

Based on your responses to the DNA 25 questionnaire, this report indicates your development of 25 personal skills. These 25 personal skills contribute to superior performance in many jobs. Your development of these personal skills are categorized into four levels:

- 1) Well Developed
- 2) Developed
- 3) Moderately Developed
- 4) Needs Development

While personal skills are certainly important for career development, it is not necessary to fully develop every one. In fact, development of a personal skill may not benefit your career if it isn't required in your current job. In order to optimize your career potential, it is best to focus your development efforts on the personal skills that are required in your current job, or the job you want.

Be sure to read the entire report with an open mind. Everyone has areas where they can improve. Before deciding to work on developing personal skills you have not yet fully developed, you may want to discuss the report with a trusted peer, mentor or professional coach. You may even wish to share the report with your manager. In most cases, management takes a very positive view of individuals who wish to develop their skills.
